EDUCATION

Vellore Institute of Technology, Bhopal

B-Tech. in Computer Science (Specialization in AI-ML), CGPA: 8.9 / 10.0

City Montessori School, Station Road

Class XII-PCM, Percentage-97.33

City Montessori School, Station Road

Class X, Percentage-88.33

Ashta

Aug 2023 – Present

Lucknow

April 2021 – June 2022

Lucknow

April 2019 – June 2020

TECHNICAL SKILLS

Programming Languages : C++, Python, Java ,C# ,SQL

Frameworks & Tools: Git , .NET

WORK EXPERIENCES

HCL Technologies

Machine Learning Intern | [Link](#)

Lucknow

May 2026 – June 2026

- Built a CNN-based Traffic Sign Detection system achieving 92.8% mAP on GTSRB/GTSDB dataset.
- Designed a modular 5-stage detection pipeline with data augmentation for robustness to occlusion, blur, and lighting variation.
- Trained model using transfer learning and Adam optimizer, reaching ~32 FPS inference with 92.2% F1-score.
- Evaluated performance via precision, recall, and confusion matrix; benchmarked against YOLO, SSD, and Faster R-CNN.

Some Company Name

Software Developer Intern | [Link](#)

Lucknow

May 2025 – June 2025

- Developed a Python-based Attendance and Leave Management System to automate check-in/out tracking and leave processing.
- Integrated SQLite database for secure employee data management and record retrieval.
- Generated monthly attendance and leave reports (Excel/PDF), improving HR efficiency and accuracy..

PROJECTS

Netlyze

- Developed Netlyze, a real-time desktop network traffic analysis and anomaly detection tool using Python, PyQt5, Scapy, and Dash.
- Built hybrid ML pipeline (Random Forest + Gradient Boosting) achieving 99.18% anomaly detection accuracy.
- Designed offline GUI visualizing live threats, bandwidth stats, and bottlenecks, optimized for secure, internet-restricted environments.

DocuMindAI

- Developed a full-stack **RAG-based PDF chatbot** using **React**, **FastAPI**, **Google Gemini**, and **ChromaDB** for document-grounded question answering.
- Implemented **semantic search**, PDF processing, conversation memory, and AI-powered document summarization using vector embeddings.
- Built and deployed a responsive web application on **Vercel** and **Render** with features including PDF preview, dark mode, chat export, and text-to-speech.

Health_rag

- Built a multilingual RAG health chatbot (FastAPI, ChromaDB, Gemini, React) answering in 10 Indian languages with source citations
- Designed PDF ingestion + retrieval pipeline using Gemini embeddings and vector search for grounded, hallucination-free answers
- Deployed live full-stack app using Docker on Render (backend) and Vercel (frontend)

CERTIFICATIONS

- Google IT support Certificate
- Applied Machine Learning in Python (Coursera)
- Service now Virtual Internship Program

EXTRACURRICULAR

Participated and won prizes in speech competitions, art contests, and was selected for the State-Level Drawing Competition. Represented school in Science & Mathematics Olympiads, played badminton at school tournaments, and actively organized cultural and academic events, showcasing creativity, leadership, and teamwork.
